

# Are young Australians ready for a world yet to be imagined?

## National Parent Webinar Event

**14 November 2019**

The future workplace will bring new experiences and expectations.

Children starting preschool today will engage in a very different world to the one we currently live in.

They will work in jobs that are yet to be created, use technology that has not yet been invented and face social, economic and environmental challenges that are yet to be anticipated.

To be successful in the future world of work, young people will need the skills and capabilities to navigate this new world.

They will require a portfolio of skills and capabilities to make

well-informed career decisions throughout life.

Future Ready is Australia's National Career Education Strategy that supports schools in providing high-quality career education experiences for all students.

High-quality career education builds resilient individuals who can adapt to the changing nature of work, managing multiple careers throughout their lifetime, adapting to their circumstances and needs.

As parents and carers, you play a vital role in supporting your children on their journey.

We invite you to join this FREE National webinar to find out more.
